

Seasons Greetings to MotM Members & Friends of High Value Manufacturing Everywhere

With warmest best wishes to all from the Founders' Group for a relaxing Christmas, and a safe and healthy return in 2017 to manufacturing our future prosperity!

Manufacturing on the Move is shaping up well and – together with hands-on members – we've been pro-active throughout the year on several fronts. There's much more to this than just attending conferences, although **MotM** has certainly co-orchestrated a number of key events. There is direct and ongoing, high-level engagement with onshore and international stakeholders and fellow professionals.

We'd like to share just a few of the 2016 building blocks through key activities and 1:1 direct engagement:

'Key enabling technologies' – the focus of the **World Manufacturing Forum**, Barcelona: Keynote / panellist.

New **UNSW Industry Advisory Network** – Four 'facilitating members' in the industry engagement enhancement team

Met at Minister- and CEO-level of **national technology & innovation companies** from Indonesia & Finland, plus high-level French and Swiss representation

Delivered 2x key Project Management workshop blocks for the **PhD Professional Development Group** of a **CRC** in transition – plus the 'Getting Things Done' panel session

Engagement with **industry development programs** in the EU and the UK

Met with **Intelligent Transportation Systems Canada**, hosts of **ITS 2017**

Met with UK '**Transport Systems**' and '**Future Cities**' Catapult Centres

Launch event for **IM CRC @ UNSW**: Chaired by **MotM**, plus founder members participant support

Published – by invitation – and syndicated key issue opinion pieces for **Manufacturers' Monthly**

Manufacturing Toolbox – Collaborating with <http://manufacturing.digitaltoolbox.org/>

Met with high-calibre delegation from **Coventry University, UK** – **outstanding industry collaboration**; ongoing interaction
