

ABOUT THIS GROUP

The new '**Manufacturing on the Move™**' (**MotM™**) professional networking group, was launched 2015 as a collegiate-managed forum, interacting from and beyond a LinkedIn platform.

MotM™ generates networking, discussion and broader engagement amongst those individuals and organisations passionately committed to a viable future for Australian High-Value Manufacturing, evidenced by actions resulting to implement collective views and goals.

This group is developing in broader advocacy, collaborative facilitation, policy shaping and outreach activities from an expanding membership base of forum participants.

Using business networking systems and appropriate social media to empower, develop and share individual thinking, the aims of **MotM™** are to positively influence industry, thought leaders and decision makers – including Australian Parliaments – in shaping and implementing policy settings that support delivery of value-add benefits to the broader economy by a highly competitive manufacturing sector.

The **MotM™** group is amenable to forming collaborative alliances with like-minded initiatives or those associations having converging views about the key role of manufacturing in future Australian prosperity.
